# Busca no PubMed

The screenshot shows the PubMed website interface. At the top, there is a navigation bar with 'NCBI Resources' and 'How To' menus, and a 'Sign in to NCBI' link. Below this is the 'PubMed.gov' logo and the text 'US National Library of Medicine National Institutes of Health'. A search bar is present with a dropdown menu set to 'PubMed' and a 'Search' button. A 'Help' link is also visible. The main content area features a large banner with the text 'PubMed comprises more than 27 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full-text articles and publisher web sites.' Two red arrows point from the search bar area to two pink callout boxes: 'Busca simples' (Simple Search) pointing to the search bar, and 'Busca avançada' (Advanced Search) pointing to the 'Advanced' link below the search bar. Below the banner, there are three columns of links: 'Using PubMed' (Quick Start Guide, Full Text Articles, FAQs, Tutorials, New and Noteworthy), 'PubMed Tools' (Mobile, Citation Matchers, Clinical Queries, Topic-Specific Queries), and 'More Resources' (MeSH Database, Journals in NCBI Databases, Clinical Trials, E-Utilities (API), LinkOut). At the bottom, there are three sections: 'Latest Literature' (New articles from highly accessed journals, Biochim Biophys Acta (6)), 'Trending Articles' (PubMed records with recent increases in activity, In vivo imaging reveals a tumor-associated macrophage-mediated resistance pathway in anti-PD-1 therapy), and 'PubMed Commons' (Featured comments, Beta2-adrenergic receptor in diabetic models: Author Y Xiang replies to G Santulli on other findings in mice. bit.ly/2pYKKIh).

<https://www.ncbi.nlm.nih.gov/pubmed/>

# Busca avançada no PubMed

The screenshot shows the PubMed Advanced Search Builder interface. At the top, there are navigation links for NCBI, Resources, and How To. The main heading is "PubMed Advanced Search Builder". Below this, there is a text input field with the placeholder "Use the builder below to create your search". A red callout bubble points to this field with the text "Especifica o campo de pesquisa". Below the input field are "Edit" and "Clear" links. The "Builder" section contains two rows of search criteria. The first row has a dropdown menu set to "All Fields" and an empty text input field. The second row has a dropdown menu set to "AND" and another dropdown menu set to "All Fields", followed by an empty text input field. Below the builder is a "Search" button and a link "or Add to history". A "History" section is located below, with links for "Download history" and "Clear history". A table displays the search history with columns for "Search", "Add to builder", "Query", "Items found", and "Time".

| Search | Add to builder      | Query            | Items found             | Time     |
|--------|---------------------|------------------|-------------------------|----------|
| #6     | <a href="#">Add</a> | Search conation  | <a href="#">1851186</a> | 12:27:08 |
| #5     | <a href="#">Add</a> | Search cognition | <a href="#">227422</a>  | 12:27:00 |
| #4     | <a href="#">Add</a> | Search emotion   | <a href="#">222001</a>  | 12:26:52 |

# Especificando a busca no PubMed

The image shows the PubMed Advanced Search Builder interface. At the top, there is a navigation bar with "NCBI Resources" and "How To" menus, and a "Sign in to NCBI" link. Below this, the "PubMed Advanced Search Builder" title is displayed. A red callout box with the text "Campos de pesquisa" (Search fields) points to the search input area. The search area includes a dropdown menu for "Use the" (currently set to "Affiliation"), a search input field, and a "Clear" button. Below the search area, there are several rows of search criteria, each with a dropdown menu and a "Show index list" link. The interface also features a "Builder" section with a "Search" button, a "History" section, and a "There is" section. At the bottom, there are sections for "GETTING STARTED", "POPULAR", "FEATURED", and "NCBI INFORMATION".

Summary

Search results  
Items: 5

[Cognition](#)  
1. Intellectual or mental process whereby an organism obtains knowledge.

[Cognition Disorders](#)  
2. Disorders characterized by disturbances in mental processes related to learning, thinking, reasoning, and judgment.  
Year introduced: 1969

[Cognitive Therapy](#)  
3. A direct form of psychotherapy based on the interpretation of situations (cognitive structure of experiences) that determine how an individual feels and behaves. It is based on the premise that **cognition**, the process of acquiring knowledge and forming beliefs, is a primary determinant of mood and behavior. The therapy uses behavioral and verbal techniques to identify and correct negative thinking that is at the root of the aberrant behavior.  
Year introduced: 1990

[Metacognition](#)  
4. Awareness and understanding of one's own thought processes.  
Year introduced: 2016

[Mental Status and Dementia Tests](#)  
5. Tests designed to assess various aspects of neurocognitive function and/or dementia.  
Year introduced: 2018

## Welcome to Medical Subject Headings!

The NLM's curated medical vocabulary resource.

Our main purpose is to provide a hierarchically-organized terminology for indexing and cataloging of biomedical information such as MEDLINE/PUBmed and other NLM databases. We also distribute pharmaceutical information through our RxNorm database, and manage the curation of the UMLS and SnoMed database.

### Explore MeSH Vocabulary

- [MeSH Browser](#) our default search tool for finding keywords
- [MeSH on Demand](#); our new app that finds keywords for you
- [MeSH RDF](#); discover MeSH on the Semantic Web
- [MeSH PublicationTypes](#); View Pubtypes with Scope Notes

### What's New

Visit our [What's New](#) page to see all recent MeSH developments including the most recent ones listed below

- [MeSH Translations Webpage](#) - Learn about the MeSH Translation Management System (MTMS)
- [2017 MeSH files](#)- The November release of 2017 MeSH Descriptors, Qualifiers, and Supplemental Records is now available.
- [A new version of the MeSH Browser](#) is now running! The old browser has been retired after many years of service.
- [New FTP site!](#) MeSH files from 1999-present are now available via a simple FTP file structure

### Obtain MeSH Data

- [Download](#) electronic copies of MeSH.
- Lists of [Annual Changes to MeSH](#).
- [MeSH on Demand](#).
- [Access RDF MeSH Data](#)
- [View MeSH Pubtypes](#)

### Learn About MeSH

- [MeSH Fact Sheet](#)
- [Tutorials and Webinars](#)
- MeSH Vocabulary
  - [Introduction to MeSH](#)
  - [Browser Instructions](#)
  - [Finding Keywords for Publications](#)
  - [Translation of MeSH using MTMS system](#)

**MeSH on Demand**

- **MeSH on Demand** identifies MeSH Terms in your text using the [NLM Medical Text Indexer \(MTI\)](#) program. After processing, MeSH on Demand returns a list of MeSH Terms relevant to your text. For more information about MeSH on Demand, please see our [NLM Technical Bulletin article](#). **For electronic copies of recently presented posters on MeSH on Demand applications please send your requests to: [NLMMESH-MOD@mail.nih.gov](mailto:NLMMESH-MOD@mail.nih.gov).**
- **Please Note:** This tool is **NOT** intended for processing personally identifiable, sensitive or protected-health information. The system is not configured for secure communications. It is your responsibility to NOT submit any personally identifiable, sensitive or protected-health information.
- **MeSH on Demand** does not retain or otherwise reuse any text submitted for processing.

Text to be Processed (Single block of text, maximum 10,000 characters):

Currently Identifying 2016 MeSH Terms

Find MeSH Terms

Reset Form

**Helpful Hints:**

- Typical MTI processing takes approximately 30 - 45 seconds. Processing time depends on the amount of text provided - the more text, the longer MTI takes to process.
- Provide well-defined sentences. Long lists without sentence breaks force MTI to take longer to process and may end without any results. If your input text contains Non-ASCII characters, an attempt is made to convert the text to ASCII before processing with MTI.
- The results provided by MeSH on Demand are a simple list of MeSH Terms that MTI identifies as being relevant to your text. Each of the identified MeSH Terms has a link to the corresponding [MeSH Browser](#) Web page for that MeSH Term.

MeSH on Demand has been developed in close collaboration among [Medical Subject Headings \(MeSH\) Section](#), [NLM Index Section](#) and the [Lister Hill National Center for Biomedical Communications](#).

**Full Disclaimer:** The MeSH on Demand MeSH Terms are machine generated by MTI and DO NOT reflect any human review. MTI may recommend MeSH Terms not explicitly found in the text and may not recommend MeSH Terms that are in the text. This is a result of machine logic that attempts to emulate human indexer behavior in characterizing biomedically relevant parts of the text. These results will undoubtedly differ from any human-generated indexing.

*Your comments, questions, and feedback are Welcome!*

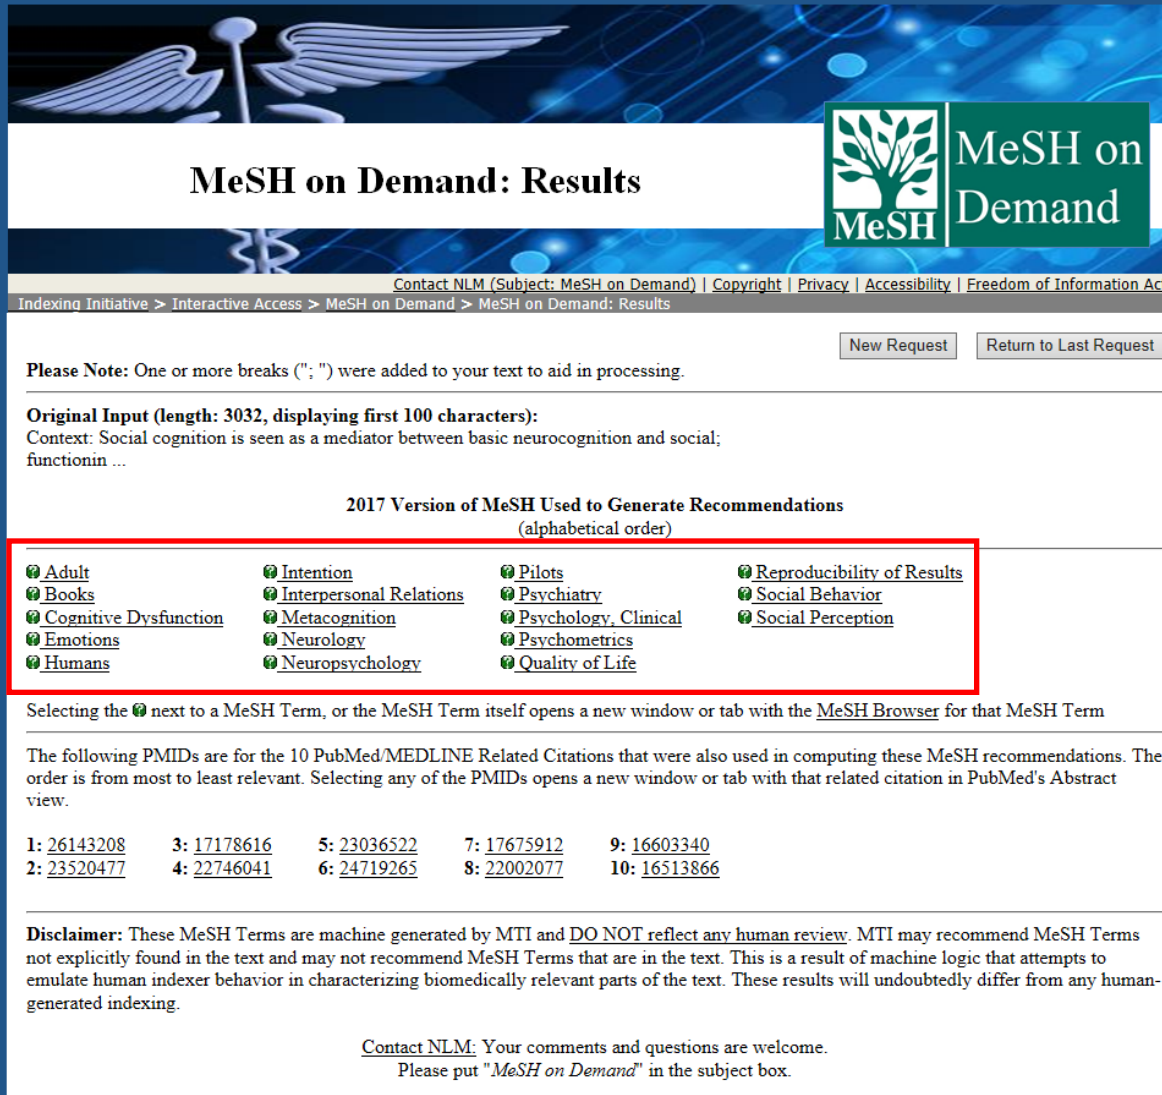

All requests are handled through the [Contact the National Library of Medicine](#) page. Please include "MeSH on Demand" in the subject line so we can respond quickly to your request.

Selecting the  next to a MeSH Term, or the MeSH Term itself opens a new window or tab with the [MeSH Browser](#) for that MeSH Term

The following PMIDs are for the 10 PubMed/MEDLINE Related Citations that were also used in computing these MeSH recommendations. The order is from most to least relevant. Selecting any of the PMIDs opens a new window or tab with that related citation in PubMed's Abstract view.

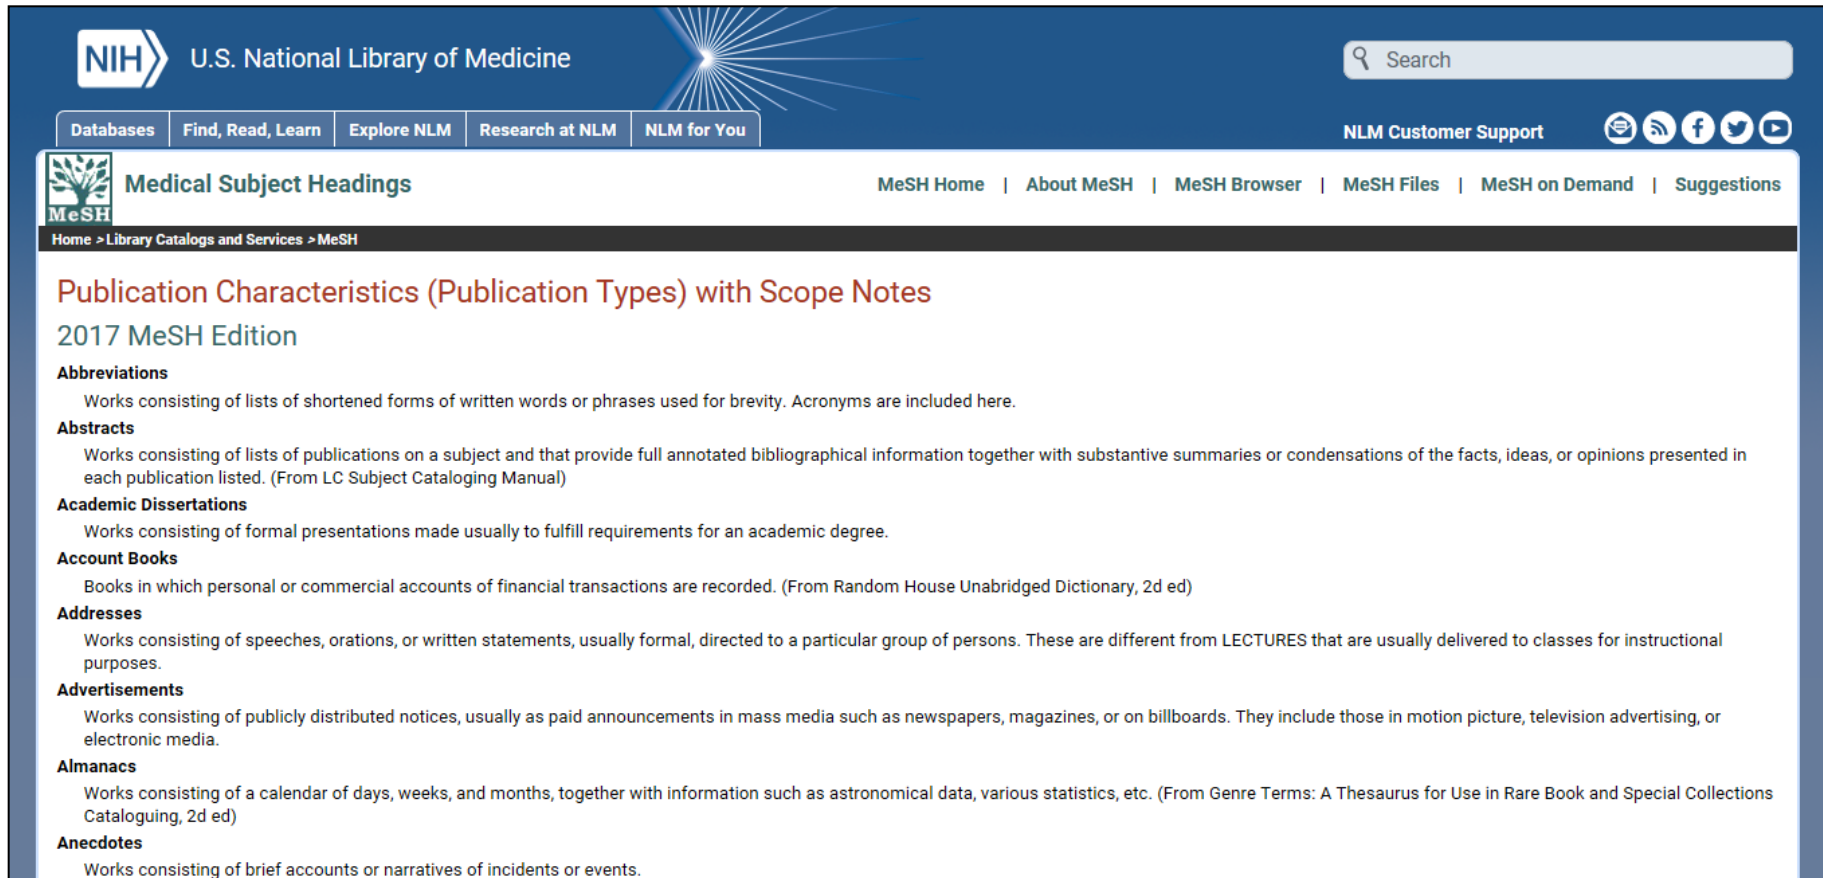

1: [26143208](#)    3: [17178616](#)    5: [23036522](#)    7: [17675912](#)    9: [16603340](#)  
2: [23520477](#)    4: [22746041](#)    6: [24719265](#)    8: [22002077](#)    10: [16513866](#)

**Disclaimer:** These MeSH Terms are machine generated by MTI and DO NOT reflect any human review. MTI may recommend MeSH Terms not explicitly found in the text and may not recommend MeSH Terms that are in the text. This is a result of machine logic that attempts to emulate human indexer behavior in characterizing biomedically relevant parts of the text. These results will undoubtedly differ from any human-generated indexing.

[Contact NLM](#): Your comments and questions are welcome.  
Please put "*MeSH on Demand*" in the subject box.

# Tipos de publicação (*MeSH Publication Types*)

The screenshot shows the MeSH website interface. At the top, there is the NIH logo and the text 'U.S. National Library of Medicine'. A search bar is located on the right. Below the header, there are navigation tabs: 'Databases', 'Find, Read, Learn', 'Explore NLM', 'Research at NLM', and 'NLM for You'. On the right side, there is a 'NLM Customer Support' link and social media icons for email, RSS, Facebook, Twitter, and YouTube. The main content area is titled 'Medical Subject Headings' and includes a breadcrumb trail: 'Home > Library Catalogs and Services > MeSH'. The main heading is 'Publication Characteristics (Publication Types) with Scope Notes' for the '2017 MeSH Edition'. Below this, there is a list of publication types with their definitions:

- Abbreviations**  
Works consisting of lists of shortened forms of written words or phrases used for brevity. Acronyms are included here.
- Abstracts**  
Works consisting of lists of publications on a subject and that provide full annotated bibliographical information together with substantive summaries or condensations of the facts, ideas, or opinions presented in each publication listed. (From LC Subject Cataloging Manual)
- Academic Dissertations**  
Works consisting of formal presentations made usually to fulfill requirements for an academic degree.
- Account Books**  
Books in which personal or commercial accounts of financial transactions are recorded. (From Random House Unabridged Dictionary, 2d ed)
- Addresses**  
Works consisting of speeches, orations, or written statements, usually formal, directed to a particular group of persons. These are different from LECTURES that are usually delivered to classes for instructional purposes.
- Advertisements**  
Works consisting of publicly distributed notices, usually as paid announcements in mass media such as newspapers, magazines, or on billboards. They include those in motion picture, television advertising, or electronic media.
- Almanacs**  
Works consisting of a calendar of days, weeks, and months, together with information such as astronomical data, various statistics, etc. (From Genre Terms: A Thesaurus for Use in Rare Book and Special Collections Cataloging, 2d ed)
- Anecdotes**  
Works consisting of brief accounts or narratives of incidents or events.

# Página do NLM Catalog

<https://www.ncbi.nlm.nih.gov/nlmcatalog>

The screenshot shows the NLM Catalog website. At the top, there is a navigation bar with "NCBI Resources" and "How To" menus, and a "Sign in to NCBI" link. Below this is a search bar with "NLM Catalog" selected in a dropdown menu, a search input field, and a "Search" button. A "Help" link is also present. The main content area features a header with a photograph of the National Library of Medicine building and the text: "The NLM Catalog provides access to NLM bibliographic data for journals, books, audiovisuals, computer software, electronic resources and other materials. Links to the library's holdings in LocatorPlus, NLM's online public access catalog, are also provided." Below the header are three columns of links: "Using NLM Catalog" (including "How to Search for Journals", "Tutorials", "NLM Catalog FAQs", and "New and Noteworthy"), "NLM Catalog Tools" (including "Journals in NCBI Databases", "Broad Subject Terms", "Authority Index", and "Journal Lists by FTP"), and "More Resources" (including "MeSH Database", "Images in the History of Medicine", "Locator Plus", and "E-Utilities"). A red arrow points to the "Journals in NCBI Databases" link. At the bottom, there is a breadcrumb trail: "You are here: NCBI > Literature > National Library of Medicine (NLM) Catalog" and a "Support Center" link. A footer section contains five columns of links: "GETTING STARTED" (NCBI Education, NCBI Help Manual), "RESOURCES" (Chemicals & Bioassays, Data & Software), "POPULAR" (PubMed, Bookshelf), "FEATURED" (Genetic Testing Registry, PubMed Health), and "NCBI INFORMATION" (About NCBI, Research at NCBI).

**Emotion perception: a componential perspective.**

Shuman V<sup>1</sup>, ... , Scherer KR<sup>1</sup>.

**Author**

**Abstract**

The common conceptual understanding of emotion is that they are multi-componential, including subjective feelings, appraisals, psychophysiological activation, action tendencies, and motor expressions. Emotion perception, however, has traditionally been studied in terms of emotion labels, such as "happy", which do not clearly indicate whether one, some, or all emotion components are perceived. We examine whether emotion percepts are multi-componential and extend previous research by using more ecologically valid, dynamic, and multimodal stimuli and an alternative response measure. The results demonstrate that observers can reliably infer multiple types of information (subjective feelings, appraisals, action tendencies, and social messages) from complex emotion expressions. Furthermore, this finding appears to be robust to changes in response items. The results are discussed in light of their implications for research on emotion perception.

**KEYWORDS:** Emotion perception; componential emotion; emotion expression

PMID: 26308096 DOI: [10.1080/02699931.2015.1075964](https://doi.org/10.1080/02699931.2015.1075964)
